 No deity will save us; we must save ourselves."*

Humanist Manifesto II

Throughout most of our country's history, schoolchildren were taught that America was good, that our moral foundations and the resulting freedoms carried a high price for the men and women who fought for them. But today, much of what is good about America has been lost. We, as a people, for at least two generations have not been exposed to the original vision, ideas, and principles that drove our forefathers and gave birth to the greatest free nation the world has ever seen.

Although America has its faults and failures, we have much to remember and be thankful for. The character and sacrifice of previous generations for liberty and self-government demands that we tell their story in the face of a culture that refuses to honor their legacy. **THE GREATEST STORY NEVER TOLD** dynamically reveals the pivotal role of faith in America's public and private institutions.

You will learn how Christianity produced:

- The foundation of our laws and government with the Bible as the basis for morality and wisdom
- The foundation for our education system
- The personal discipline, humility, restraint, and virtue necessary for a free and self-governing society to operate
- The principles of religious liberty
- Prayer for help and the protection of Divine Providence

***I will remember the deeds of the LORD;
yes, I will remember your miracles of long ago.
- Psalm 77:11***

... always be prepared to give an answer to everyone who asks you to give the reason for the hope that you have. But do this with gentleness and respect. - 1 Peter 3:15

You will learn how to defend:

- The Biblical role of government
- The role of Christianity in America's history
- Creator-endowed rights and religious freedom
- The original intent of the 1st Amendment
- Private virtue as a prerequisite to public morality
- The role of faith in the public conversation

You will learn how to tell the story to the next generation:

"Freedom is never more than one generation away from extinction. We didn't pass it to our children in the bloodstream. It must be fought for, protected, and handed on for them to do the same, or one day we will spend our sunset years telling our children and our children's children what it was once like in the United States where men were free." - U.S. President Ronald Reagan
