Michigan's Top Education Leaders Stand with Progressive Agenda, and Ignore the Innocence of Children

Lansing, MI - November 14, 2025 – Yesterday evening, in a 6 - 2 vote, the State Board of Education voted to adopt irresponsible Health Standards that jeopardize the innocence of children.

President Eileen McNeil, who attended and testified at the meeting on Thursday, commented following the vote, *“This vote taken by the State School Board very clearly revealed the political, sexual agenda they have for influencing our children – parents just got a clarion call to stay engaged.”*

She continued, *“We just witnessed a body of elected Board members who are responsible for the direction of the local school districts that serve millions of children, expose their priorities: ignoring parents, disdainning Michigan law and elevating “experts” from the state of Massachusetts whose Health Standards they just adopted. We just saw a groundswell of parents waking up to this. We encourage them to know the law and take back your schools!”*

The standards were originally presented to the State Board of Education for review and public comment on September 9, 2025.

In the past month thousands of parents, teachers, grandparents, and families have driven to Lansing, submitted emails to Committee members and made a public outcry that “these are not the Health curriculum standards we want for Michigan children.”

The State Board of Education majority ignored the voice of Michigan parents yesterday.

McNeil continued, *“I am disappointed and yet I am excited. A movement of historic proportions is just beginning. Parents will not surrender their right to protect their children from harm-filled agendas. But if they think they have seen the end of this, they have just lit the match that is about to start a groundswell that is uncontrollable. Only good things are coming - but it's not through these Health Standards.”*
